

Hinged Knee Braces

M-Brace Vega Plus Patella Knee Brace

The **Vega Plus** is a patella knee brace is made from 100% cotton velour for a comfortable yet supportive fit. It is designed to fit both the right and left knees and can accommodate thigh/calf girth disproportions without any difficulty. The design features two removable buttresses for patella control and has pre-shaped aluminum multicentric hinges that are made to emulate the natural movement of the knee. It also is lightweight and has a low profile shape that is perfect for use underneath clothes. This brace is washable, and is ideal for anyone with latex skin sensitivities. The velcro closure pieces wrap across the front of the knee and are fully adjustable for any desired compression/tightness. The closed patella design also helps to reduce any swelling that may form around the front therefore protrude out a front open hole design.

M-Brace Artemus Light Hinged Knee Brace

The M-Brace Artemus Light provides all the protection of a hinged knee brace all in a cotton velour design. The cotton material breathes unlike traditional neoprene alternatives and the compression closure straps help provide an excellent fit around the entire knee. The pre-shaped hinges on both the medial and lateral side provide enhanced support. The Artemus light is a great hinged knee brace for older patients suffering from osteoarthritis or those with skin sensitivities. The unique locking system provides adjustable compression and enhanced comfort over more traditionally styled models.

Med Spec Gripper Hinged Knee Brace

Aids in the treatment of medial collateral and lateral collateral sprains. Can also be used post-operatively or during sports to provide medial and lateral stability and to protect against hyperextension of the knee. Internal skinloc patch: works in concert to grip the proximal end of the calf muscle and inhibits the brace from migrating distally.
