

Patella Stabilizers

DonJoy Tru-Pull Lite

Ideal Application
Latest patented technology from the Tru-Pull family of products. For acute mild to moderate patellar subluxation or dislocation and maltracking.

- Features and Benefits**
- Two-pronged strap pulls the patella into proper alignment
 - Dual Durometer Buttress System interfaces directly with the patella
 - Independent anchors at thigh and calf prevent rotation of the brace
 - Wicking fabric is hypoallergenic, breathable, and lightweight

Order Information

11-0260-x Right Sleeve **Colors:** Blue and Black
11-0261-x Left Sleeve

Refer to Size Chart Below

Drytex Adjustable Patella Donut

Ideal Application
The Drytex Adjustable Patella Donut is a neoprene alternative, constructed of a unique nylon core and polyester Lycra Fabric that allows for improved airflow. A trimable full-circumference donut provides for patellar control.

- Features and Benefits**
- Set of plastic hinges included with each brace
 - Durable, lightweight, breathable fabric
 - Trimable tubular donut for desired direction of patella control
 - Alternative to neoprene

Order Information

Patella Stabilizers

Corflex U-Shaped Patella Stabilizer

Features sewn-in U-shaped solid tubular buttress to provide optimal contact and patella stability with spiral stays to prevent rollover; available with either superior or inferior buttress placement. Indicated for patella subluxation, patello-femoral tracking syndrome, treatment of patella alta/baja and as part of a rehab program for patella tendon injuries.

Patella Stabilizers

Bledsoe Knee Support

The Bledsoe Knee Support is available in a Closed Patella version and an Open Patella version. The **Knee Support** features a traditional neoprene sleeve which provides support, compression, padding and warmth to the knee. The **Open Patella** version utilizes a horseshoe buttress to manage patella tracking. The patellar opening enhances comfort and freedom of movement.

Indications: Sore, strained or sprained knee ligaments. Open Patella version also indicated for patella tracking support.

Medspec Dyna Track Patella Stabilizer

Great choice to aid in the treatment of patellofemoral dysfunction. Internal buttress: can be positioned to apply either lateral or medial pressure on the patella. Large popliteal opening: permits high degree of flexion with no discomfort. Universal sizing: fits left or right knee. Easily adjusted to desired amount of pressure: the tension on the straps can be changed by adjusting the straps leading from the internal buttress and the tension on the outer neoprene wrap. US manufacturing: higher quality control

Townsend Sport

Townsend's durable, versatile, low profile Sport Series braces provide stabilization, support and compression for mild knee sprains and ligament injuries. Sport Series braces have rigid pockets that contain and cover the bars and hinges, so there is no exposed metal. These braces can be ordered with three different Townsend Motion Hinge designs.

Product Features and Benefits

12" (two strap) or 16" (four strap) latex-free neoprene sleeves. Anterior closure or pull-on sleeves. Rigid nylon pockets encase the bars (no exposed metal). Condylar pads sewn into the sleeves. High quality unbrushed loop straps (2000 cycle-type). Popliteal cutout on posterior aspect of knee for unrestricted flexion. Adjustable patella buttress pads (pull-on models only). Choice of Standard or upgrade hinges.

Patella Stabilizers

DonJoy S.E.R.F. Strap (Stability thru External Rotation of the Femur)

Ideal Application The S.E.R.F. Strap is suited for patients with patellofemoral or anterior knee pain resulting from excessive hip internal rotation, adduction, and/or knee valgus. The S.E.R.F. Strap can be used to control abnormal hip motion during leisure/sport activities and can be used as a training tool.

Features and Benefits

- Unique 3-point hip-leg anchor reduces patellofemoral pain by externally rotating the hip
- Thin Breath-O-Prene material is lightweight, breathable, and is designed to be worn underneath clothing
- Contoured design limits migration during activity
- Re-Application markers for easy re-application and improved patient compliance
- 3 sizes fitted using a height-weight index
- 6 month warranty

DonJoy Tru-Pull Advanced System

Ideal Application

For symptomatic pain relief of patellofemoral dysfunction including subluxation/dislocation, mal-tracking and patellar tendonitis.

Features and Benefits

- Elastomeric pull device, has a rubber band type effect providing a strong dynamic pull on the patella as the knee extends.
- Independent anchors prevent rotation of the brace and provide consistent pull on the patella to avoid lateral subluxation.
- Choice of 1/4" and 3/8" buttresses to give the patient the leverage they require.

Patella Stabilizers

M-Brace Vega Patella Knee Brace

The **M Brace Vega Patella Knee Brace** provides a unique closure system to provide excellent protection for the patella all in a neoprene-free model. This model is universal for use on both the right and left knee and is made of 100% cotton velour perfect for anyone with skin sensitivities. This patella knee brace fits comfortably around any leg with a disproportionate thigh to calf size because of its cinch up design. The material around the front of the patella is covered to reduce any window edema formation. The individual closure locking straps are designed to provide a more customized fit. Two "C"-shaped buttress are located on the inside of the brace to provide patella control with any type of activity.

Indications: Patella instability. Patellar sub-luxation. Femur-patella arthritis. Rehab phase of patella fracture or post-surgery.

M-Brace Vega Plus Patella Knee Brace

The **Vega Plus** is a patella knee brace is made from 100% cotton velour for a comfortable yet supportive fit. It is designed to fit both the right and left knees and can accommodate thigh/calf girth disproportions without any difficulty. The design features two removable buttresses for patella control and has pre-shaped aluminum multicentric hinges that are made to emulate the natural movement of the knee. It also is lightweight and has a low profile shape that is perfect for use underneath clothes. This brace is washable, and is ideal for anyone with latex skin sensitivities. The velcro closure pieces wrap across the front of the knee and are fully adjustable for any desired compression/tightness. The closed patella design also helps to reduce any swelling that may form around the front therefore protrude out a front open hole design.

Indications: Patella instability. Patellar subluxation. Femur-patella arthritis. Rehab phase of Patella fracture or post-surgery. MCL/LCL sprains.
