

Thigh Braces

Bledsoe Simple Pelvic Brace

The **Bledsoe Simple Pelvic Brace** is the solution to the difficult problem of hip rotational control. This off-the-shelf brace fits like a custom and can be applied in less than 10 minutes. The Bledsoe Simple Pelvic Brace limits hip flexion/ extension as well as abduction and adduction in 15° increments from -30° to 105° and locks in any position from -30° to 60°.

Product Features and Benefits Controls rotation, abduction and limits or locks range of motion about the hip. Sturdy, formable aluminum uprights and rigid plastic shells for positive control. Soft breathable foam wraps for patient comfort. Non-stretch pile straps that encompass the entire brace, interlocking all components.

Indications: This device is indicated to limit motion and reduce incidence of dislocation of the hip and to provide limited motion of hip abduction or adduction after injury or operative procedures to the hip joint.

Size and Order Information

Leg Length	Iliac Crest Circumference	Thigh Circumference	Brace Size	Left	Right
22"-26" (56-66 cm)	38" Max. (96.5 cm Max.)	26" Max. (66 cm Max.)	S	AT013101	AT013201
26"-30" (66-76 cm)	45" Max. (114 cm Max.)	30" Max. (76 cm Max.)	M	AT013103	AT013203
30"-34" (76-86 cm)	55" Max. (140 cm Max.)	34" Max. (86 cm Max.)	L	AT013105	AT013205

Measure the leg length from the crotch to the ankle and use the conversion chart shown below to determine appropriate brace size. If the iliac crest or thigh circumference is larger than the maximum, you must order a custom brace. Do not order the next larger size! *Example:* If the patient has a 22" (56 cm) leg length, but their iliac crest circumference is 43" (109 cm), they will need a custom Pelvic Brace.

Bledsoe Philippon Post-Op Hip Brace

The **Bledsoe Philippon Post-Op Hip Brace** was developed in collaboration with Dr. Marc Philippon, MD, Director of Sports Medicine/Hip Disorders at the University of Pittsburgh. The brace limits hip flexion/extension as well as abduction and adduction in 15° increments from -30° to 105°. The brace can also lock in any position from -30° to 60°. The post-operative or post-injury brace protects patients following total hip revisions, arthroscopic hip repairs or other hip joint surgeries, injuries or problems that can benefit from range-of-motion control.

Indications: This device is indicated for post-operative or post-injury use for limited range-of-motion control of hip flexion/ extension; as well as limited abduction and adduction of the hip joint following total hip revisions, arthroscopic hip repairs or other hip joint surgeries, injuries or problems that can benefit from range-of-motion control.

Size and Order Information

Size	Leg	Part Number		
		Brace	w/ Positioning Kit	w/ Positioning Kit & Post Pad
Regular 5'4" (163 cm) and taller	Left	AT090105	AT094105	AT093105
